

WISCONSIN AGRICULTURAL STATISTICS

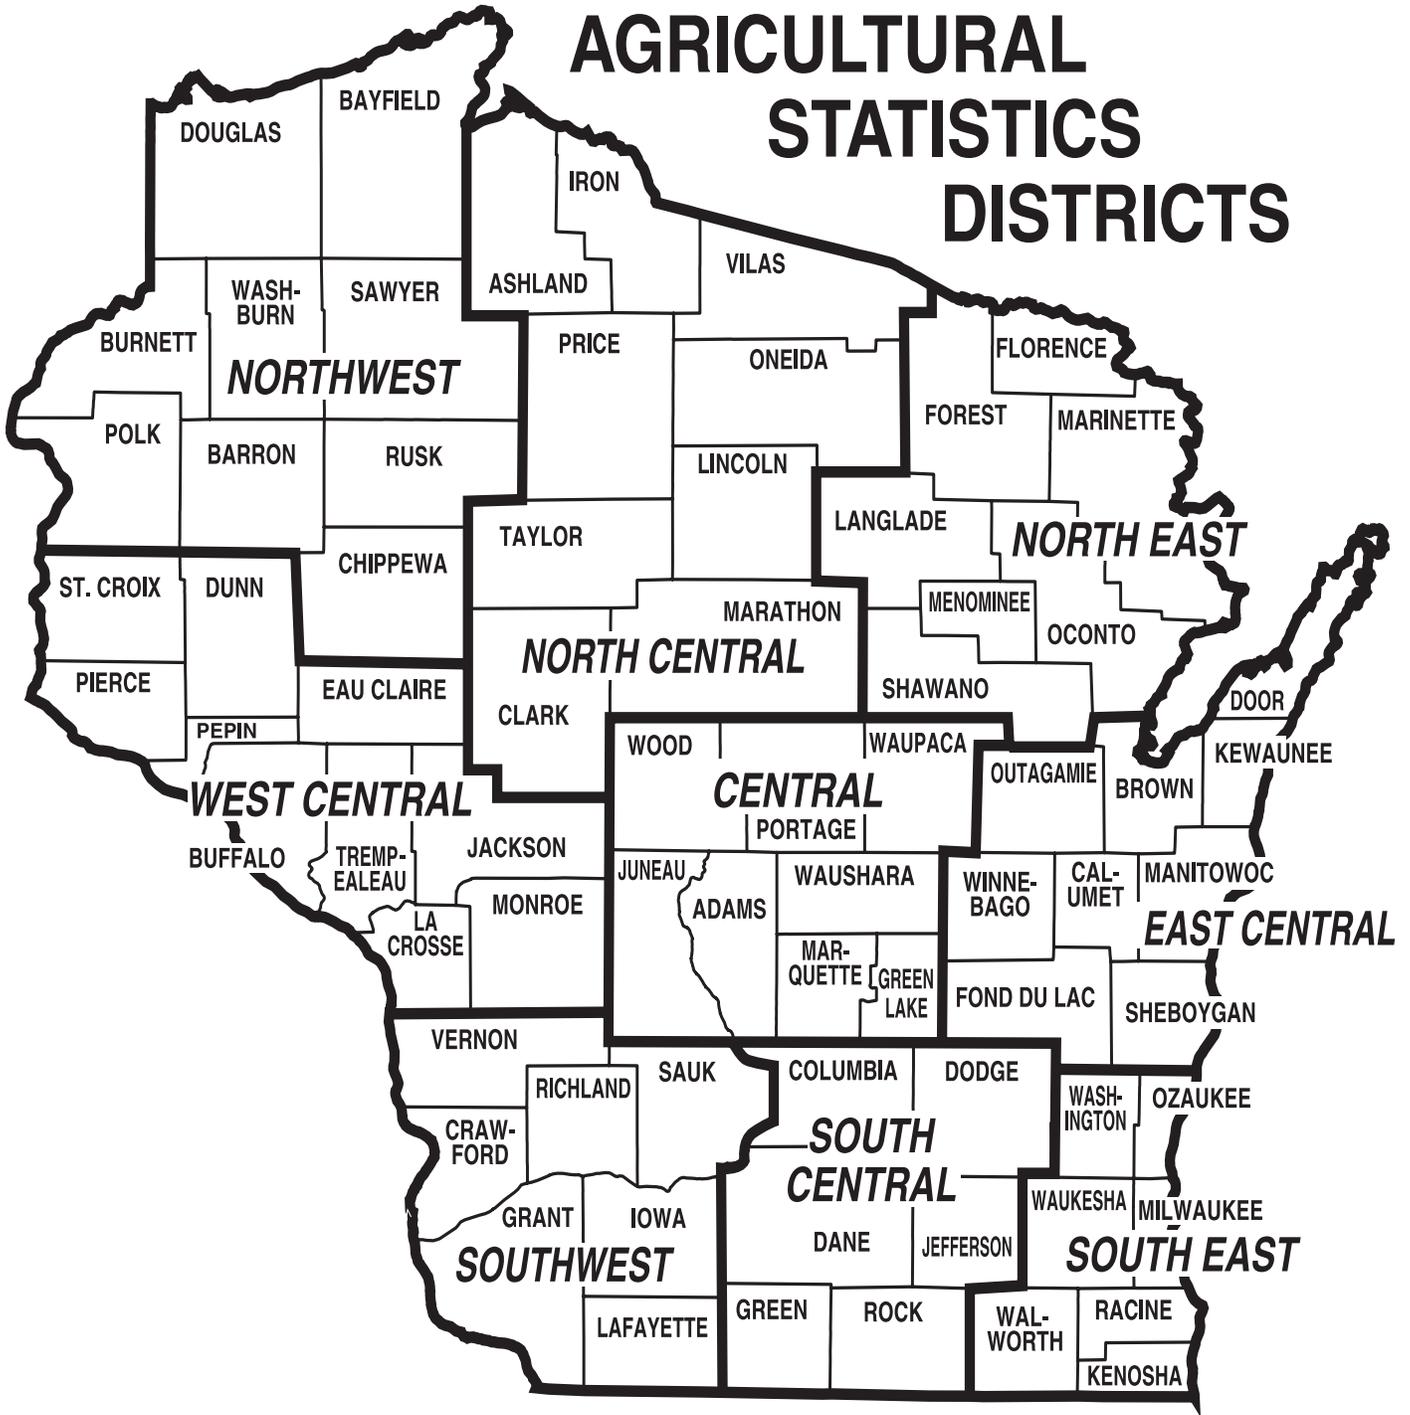

There were
5.11 million layers
in Wisconsin in 2014.

They laid an average of
284 eggs each for a total of
1.45 billion eggs produced.

Wisconsin farms sold
88.9 million organic eggs
in 2014 for a total of **16.6 million dollars**.

2015 Wisconsin Agricultural Statistics

The USDA's National Agricultural Statistics Service (NASS), Wisconsin Field Office is proud to present 2015 edition of *Wisconsin Agricultural Statistics*. This publication, a collaborative effort with the Wisconsin Department of Agriculture, Trade, and Consumer Protection (DATCP), is published annually and highlights agriculture as Wisconsin's number one industry. This statistical profile of Wisconsin's agriculture not only includes state level information but also information at the county level.

Throughout this publication you will find many interesting statistics about Wisconsin's diverse and dynamic agriculture industry. I would like to highlight the fact that in the 2014 ranking of states, Wisconsin ranked number one in American cheese, cheddar cheese and total cheese production, dry whey for human consumption, milk goat inventory, mink pelts produced, corn harvested for silage, snap beans and carrots for processing, and cranberry production. Wisconsin ranked number two in mozzarella and total Italian cheese production, milk production and milk cow inventory.

Publication and dissemination of agricultural statistics is only possible with cooperation of farmers, agribusiness, commodity groups, and countless others who gave their valuable time to provide the information for the content within this publication. Without their cooperation and support in providing timely and accurate data, this information would not be available to the agricultural community in Wisconsin.

I also want to thank our help from the National Association of State Department of Agriculture enumerators for their outstanding work in collecting and providing quality agriculture statistics for Wisconsin. In addition, the Wisconsin Field Office has a dedicated staff that helped put this publication together. Everyone involved is very committed to the work they do and I am thankful for their dedication to Wisconsin agriculture.

I hope you find this information beneficial for your agricultural interests. Throughout the year, NASS releases many other new reports and they are posted at www.nass.usda.gov. Please contact me anytime with your comments, questions, or requests for assistance.

Sincerely,

Greg A. Bussler
State Statistician

September 2015

State of Wisconsin
Governor Scott Walker

Department of Agriculture, Trade and Consumer Protection
Ben Brancel, Secretary

Greetings on behalf of the Wisconsin Department of Agriculture, Trade and Consumer Protection.

2014 will be a year to remember by the agricultural community. Wisconsin agriculture set a record in 2014 for net farm income, \$4 billion strong.

When dairy farmers think back to 2014, they will recall the high milk prices. What made the year even more remarkable was that these record high milk prices were coupled with lower feed costs. The state's approximately 10,000 dairy farmers have been able to use these margins to pay down debts, invest in their farms and prepare for transition.

With a record milk production of 27.8 billion pounds of milk in 2014, Wisconsin's dairy processors were able to maintain their leadership in cheese production. Specialty cheeses accounted for 23% of Wisconsin's total cheese production in 2014.

Even while corn and soybean prices were lower than we'd like to see, Wisconsin farmers still generally fared better than their colleagues across the U.S. Wisconsin vegetable farmers continued to grow tons of potatoes, snap beans, carrots and more to maintain its position as a vegetable powerhouse.

Consumers around the world continue to appreciate the quality and bounty of Wisconsin's agriculture products. In 2014, Wisconsin exported more than \$3.6 billion worth of agricultural products to more than 145 countries. This was a record for the state and the fifth consecutive year that Wisconsin has been able to boast an increase in agricultural exports.

This publication presents the facts. Use these statistics to learn about the diversity of Wisconsin agriculture, from our grains to our fur skins. Cite this source when you are discussing our state's livestock farms or our leadership in fruit production. One in nine people in Wisconsin work in a job related to agriculture.

This information is only available due to the many surveys and reports that are collected annually by the National Agricultural Statistics Service. Thank you to all those who supply the information, evaluate the numbers and share the results.

Each year brings its own challenges and own opportunities. Let's remember the highlights of 2014 as we look forward to the future.

Sincerely,

Ben Brancel

Secretary

Wisconsin Agriculture and Economics

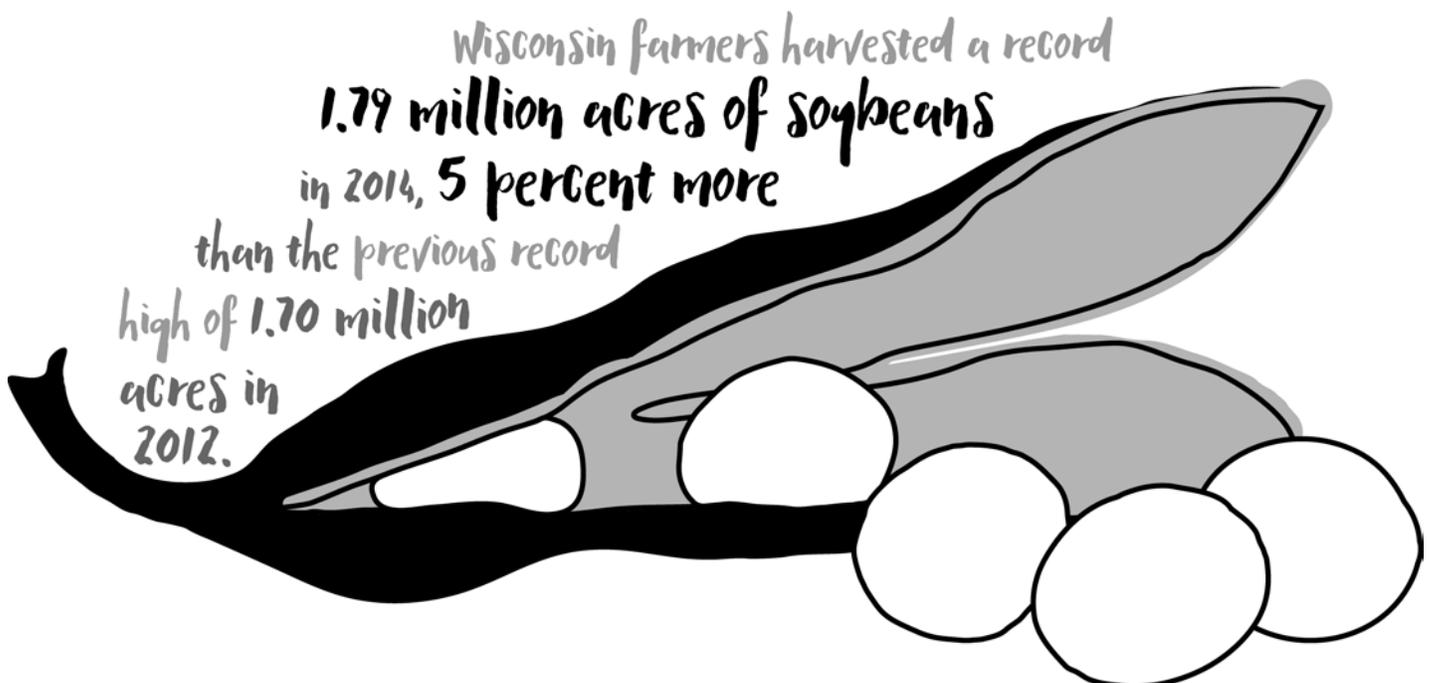

Wisconsin cash receipts from farm marketings totaled \$12.9 billion in 2014, a 7 percent increase from 2013. Receipts from livestock, dairy, and poultry comprised 73 percent of the total marketings of all commodities, compared to 66 percent the previous year. Milk sales totaled \$6.75 billion in 2014, with record high milk prices driving a 22 percent increase over the previous year's total. During the same period sales of meat animals rose 18 percent, poultry sales jumped 10 percent, and miscellaneous livestock sales fell 5 percent.

In 2014, cash receipts for all Wisconsin crops totaled \$3.48 billion, down 16 percent from 2013. Sales of feed crops fell 18 percent from 2013 due to depressed commodity prices. Corn sales were down 20 percent, to \$1.45 billion in 2014. Soybean receipts, at \$758 million, were down 13 percent. Total vegetable marketings decreased 18 percent, with steep declines in the major processing vegetables but a 48 percent increase in receipts for dry beans. Fruit and nut receipts were down 20 percent overall, with cranberries falling by 27 percent while apples climbed 33 percent.

Wisconsin farm production expenditures totaled \$13.0 billion in 2014, up 13.2 percent from \$11.5 billion in 2013. Feed expenses rose 14.1 percent to \$2.35 billion. This represented the largest single production expense for Wisconsin farmers in 2014, accounting for 18.0 percent of the total. Farm services were the second largest expense, totaling \$1.62 billion and 12.4 percent of the total. This was up 14.9 percent from 2013. The largest percentage increases were for miscellaneous capital expenses (up 250 percent) and farm improvements and construction (up 40.5 percent). Expenditures per Wisconsin farm averaged \$188,913 in 2014, 1.4 percent less than the national average of \$191,500 per farm.

In 2014, the total number of agricultural land sales in Wisconsin decreased and the value of land sold increased. The average value of all agricultural land sold rose 12 percent, to \$5,428 per acre. Land continuing in agricultural use was up 13 percent to \$5,407 per acre, while land being diverted to other uses fell 12 percent to \$5,846 per acre. The East Central, South Central and Southeast districts continued to have the highest prices overall. However, there were several reports of land being sold for frac sand mining which drove up prices of land being diverted to other uses in the Northwest and West Central regions. The total number of transactions fell to 1,628 in 2014. The number of transactions where the land continued in agricultural use fell by 306 and there were 19 more transactions where the land was diverted to other uses than in 2013. The total number of acres sold fell 16 percent to 102,136.

There were 69,000 farms in Wisconsin in 2014, down 800 from 2013. The number of farms with sales of \$500,000 to \$999,999 increased slightly and the number of farms with sales over \$1,000,000 was unchanged. The number of farms with sales of \$1,000 to 9,999, \$10,000 to \$99,999, \$100,000 to \$249,999, and \$250,000 to \$499,999 all decreased slightly. Land in farms totaled 14.5 million acres, down 100,000 acres from 2014. The average size of a Wisconsin farm increased 1 acre to 210 acres.

1/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. 2/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. 3/ Share rent income is included in cash receipts. 4/ Including expenses associated with operator dwellings. 5/ Includes federal and private crop and livestock insurance premiums as well as casualty, hail, motor vehicle and all other insurance premiums. 1/ Land sales figures reported in these tables include only averages of 'arm's length' transactions. Sales made under other than normal market conditions (such as family sales or foreclosures) are not included in this report. Sales are reviewed by the Wisconsin Department of Revenue, Bureau of Equalization. With each sale of a parcel of land, the buyer is required to file a Wisconsin Real Estate Transfer Return, documenting the parcel size, sale price, present use, and intended use of the property. State appraisers inspect the site and verify the transfer return. The sales data in this report are a summary of the Wisconsin Real Estate Transfer Returns. Specifics on land sales transactions within a certain county can be obtained by contacting the Department of Revenue directly or at www.revenue.wi.gov/retr. This report was compiled in cooperation with the Wisconsin Department of Revenue, Bureau of Equalization.

Crops

As the 2014 growing season opened, Wisconsin was still feeling the effects of one of the coldest winters on record, with deep and persistent snow cover, greater than normal frost depths, and near-record high ice coverage on lakes and rivers. Additional rain and snow kept spring tillage and planting activities behind normal during April, though progress was persistently ahead of 2013's record late planting season. Waterlogged soils dried out slowly throughout May and early June, allowing fieldwork to accelerate. Spring tillage reached 97 percent complete on June 15, only 1 percent behind the 5 year average. Heavy rains during the week of June 22 caused topsoil moistures to peak for the season at 39 percent surplus statewide. Late July and early August saw an extended period of dry, cool weather, which allowed producers to catch up on spraying and midseason fieldwork but slowed crop progress. Frequent rains in late August meant a return of muddy conditions, which persisted throughout autumn. The first frosts were reported the week of September 15, though a widespread frost held off until the week of October 6. The northern part of the state also received a record early snowfall on October 4. Late maturity, high grain moistures, and wet fields caused harvest activities to progress slowly during October, with the waterlogged northeast persistently behind the rest of the state. In mid-November, a major snow storm followed by two weeks of very cold temperatures halted tillage for much of the state. Harvest activities dragged on into mid-December, but snow cover and adverse weather made combining difficult and prevented the harvest of some fields altogether.

Statewide, temperatures from June to September were 0.5 degrees below normal in 2014, compared to 0.4 degrees above normal in 2013. June was the only month with above normal temperatures, averaging 1.7 degrees above normal. May and August had normal temperatures, while the remaining months had below normal temperatures. The growing season month with the greatest departure from normal was April, which averaged 4.3 degrees below normal. Temperatures for January through March ranged from 9.0 to 12.3 degrees below normal and November averaged 7.7 degrees below normal.

Precipitation totals for April through September were above normal across the state, with a statewide total of 27.13 inches. This was 3.30 inches above the total for 2013 and 4.70 inches above normal. Total precipitation in the northern third of the state was 6.13 inches above normal for April through September, the central third of the state was 5.11 inches above normal, and the southern third of the state was 1.31 inches above normal. July was the only month of the growing season with below normal precipitation, averaging 1.51 inches below normal. The month with the greatest departure from normal was June, with 2.50 inches above normal.

Corn planted for all purposes totaled 4.00 million acres in 2014, down 100,000 acres from the previous year. There were 3.11 million acres harvested for grain, up 3 percent from 2013. Grain yield rose to 156 bushels per acre, up 11 bushels per acre from the previous year. Acres harvested for silage dropped 13 percent to 850,000 acres and silage production decreased 3 percent to 15.7 million tons.

Planted acres of soybeans increased by 220,000 acres to 1.80 million acres. Harvested acres increased 240,000 acres to 1.79 million acres statewide. The average yield for soybeans in Wisconsin was 44.0 bushels per acre, 5.0 bushels per acre more than the previous year. With these increases in acreage and yield, total production rose 30 percent to 78.8 million bushels.

Wisconsin was second in the nation for oat production in 2014 with 8.68 million bushels, a 27 percent increase from 2013. This was primarily due to 35,000 more harvested acres. Average yield, however, dropped by 3 bushels to 62.0 bushels per acre.

There were 295,000 acres of winter wheat planted in 2014, down 20,000 acres from 2013. Acres harvested fell 15,000 acres to 250,000 acres. Production rose 6 percent to 16.3 million bushels due to a 7 bushel increase in yield per acre.

Though the winter was brutally cold, it also featured unusually early, persistent, and extensive snow cover. On May 11, winter freeze damage to alfalfa was rated 0 percent severe, 2 percent moderate and 16 percent light, with no damage to the remaining 82 percent of the crop. Cold, wet weather in April and early May made hay stands slow to green up. Abundant moisture meant a lush first crop, but soggy fields and frequent rains delayed cutting past the optimal window of maturity and prevented drying. The midsummer dry spell provided good drying conditions for the late second and early third cuttings. But excessive moisture in September slowed progress, especially for late third cutting harvest in the North-Central district. The fourth cutting caught up to average in October while other fieldwork was delayed. Hay supplies were 4 percent short, 81 percent adequate and 15 percent surplus on November 2.

Potato harvested acreage was up 1,000 acres in 2014, with 63,000 acres harvested in total. The average yield rose 10 cwt., to 430 cwt. per acre. Overall production was 27.1 million cwt., up 4 percent from the previous year.

For processing vegetables, Wisconsin remained ranked third in harvested acreage and second in production and value of production. Wisconsin remained the top producer in the nation for snap beans, contributing 46 percent of the national production. The state also ranked first in production of processing carrots and third in processing sweet corn and peas.

There were 20,700 acres of cranberries harvested in 2014, down 400 acres from the previous year's record high. Cranberry production was 5.02 million barrels, a decrease of 993,600 barrels from 2013, with yields averaging 239.5 barrels per acre. Wisconsin remained the top cranberry producing state, with 60 percent of the national production. Bearing apple acreage in Wisconsin was 4,000 acres, the same as the previous year. Apple production was 54.0 million pounds, up 6 million pounds from 2013. Tart cherry production held steady at 12.3 million pounds despite a decrease of 200 bearing acres.

Livestock & Dairy

In 2014, Wisconsin produced 27.8 billion pounds of milk, a 1 percent increase over the previous year. The number of milk cows rose slightly towards the end of the year, averaging 1.27 million head. Milk per cow rose from 21,693 pounds in 2013 to 21,869 in 2014. Milk prices began the year at \$23.80 per hundredweight (cwt.) in January, peaked at \$26.20 in April and again at \$26.60 in September and then declined to \$20.80 in December.

Wisconsin maintained its status as the nation's largest cheese producer in 2014, with 25 percent of the nation's production. From 2013 to 2014, the state's total cheese production rose 2 percent to 2.91 billion pounds. Italian cheese production was up 2 percent to 1.46 billion pounds, comprising 50 percent of Wisconsin's total production. Production of American cheeses rose 1 percent to 849 million pounds. Specialty cheese production grew from 640 million pounds in 2013 to 660 million pounds in 2014, accounting for 23 percent of the state's total cheese production.

The total inventory of cattle and calves on January 1 rose 3 percent from 2014 to 2015, to 3.50 million head. The number of milk cows rose by 5,000 head to 1,275,000 head and the number of beef cows rose 25,000 head to 275,000 head. On the U.S. level, slaughter prices rose to \$153.00 per cwt. for cattle and \$255.00 per cwt. for calves. As a result, Wisconsin's value of production rose 33 percent to \$1.92 billion.

As of December 1, 2014, hog inventory totaled 300,000 head, 5,000 more than a year earlier. Pork production totaled 143 million pounds (live weight basis), a decrease of 14 percent. Average price per cwt. on the U.S. level increased 15 percent to \$77.10 but Wisconsin's value of production dropped from \$129 million in 2013 to \$122 million in 2014.

Sheep and lamb inventory was 77,000 head as of January 1, 2015, down 6,000 from the previous year. Wool production fell 50,000 pounds to 350,000 pounds total, but the average price per pound was up 5 cents to \$0.75 per pound. Milk goat inventory dropped 2,000 head to 44,000. Wisconsin continues to have the largest number of milk goats in the nation.

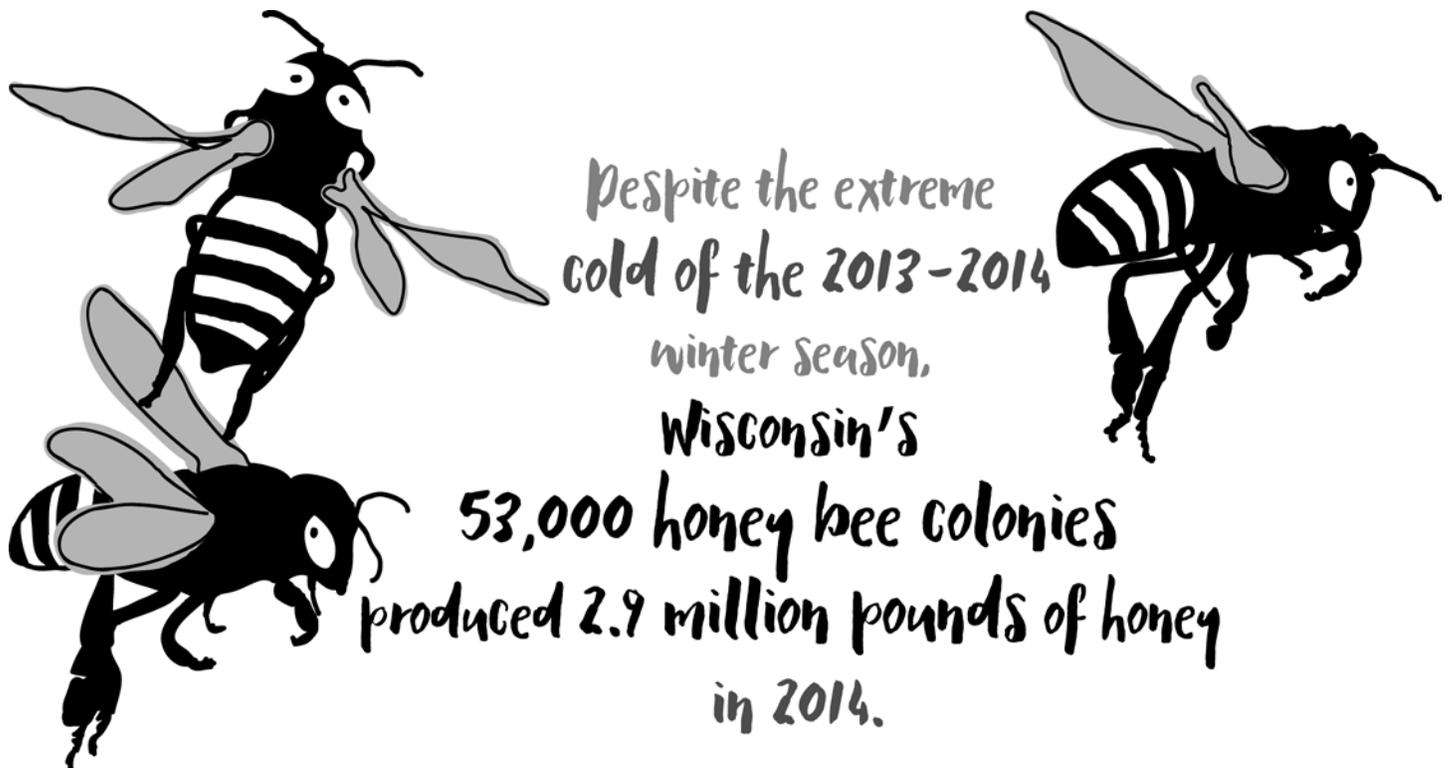

Egg production decreased 5 percent to 1.45 billion eggs for the year ending November 30, 2014. There were 5.11 million layers, with an average of 284 eggs per layer. The egg price per dozen rose 19 percent to \$1.08 in 2014. The value of production jumped 12 percent to \$130 million for 2014.

In 2014, broiler production rose to 53.4 million head. The price of broilers rose 5 percent to 64 cents per pound. The increase in broiler production and price led to a 9 percent increase in value of production.

The total sales value of trout fell 8 percent in 2014 to 1.54 million dollars. Trout distributed for restoration, conservation, or recreational purposes increased to 5.07 million fish, up 5 percent over the previous year.

Wisconsin produced 1.27 million mink pelts in 2014, an increase of 12 percent over 2013 and more than any other state. The U.S. average price per pelt rose 2 percent to \$57.70. The total value of pelts produced in Wisconsin was \$73.2 million.

Honey production fell 19 percent, from 3.54 million pounds in 2013 to 2.86 million pounds in 2014. Honey-producing colonies fell by 6,000 to 53,000. Yield per colony decreased 10 percent, from an average of 60 pounds in 2013 to an average of 54 pounds in 2014. The average price of honey fell 6 cents to \$2.32 per pound.

1/These county level numbers of milk cows and milk production are not official USDA, National Agricultural Statistics Service (NASS) estimates. They are being provided to the Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP) as part of a cooperative agreement. Any reproduction or distribution of these numbers by DATCP or any other party should be limited, and, if provided to anyone, should in no way indicate that they are official USDA, NASS estimates. 2/Average number of milk cows on farms during year, excluding heifers not yet fresh. 3/Not published, but included in state total.

2014 Certified Organic Production Survey

The 2014 Certified Organic Production Survey (COPS) is a complete inventory of all known organic producers in the United States that are certified, exempt from certification (those grossing less than \$5,000 annually from organic sales), or transitioning to organic production. This study is associated with the 2012 Census of Agriculture and was conducted by the United States Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS) in conjunction with USDA's Risk Management Agency (RMA).

In 2014, Wisconsin ranked second in the nation for the total number of organic farms with 1,228 farms. That is about nine percent of the nation's total number of organic farms. Wisconsin ranked fifth in the nation for organic sales, with a value of 201 million dollars. Wisconsin's organic sales were up 51 percent since 2008. At 111 million dollars, milk from cows was the most valuable organic commodity sold, representing 55 percent of total organic sales for the state. Wisconsin produced 11 percent of the nation's organic milk in 2014.

Complete results of this survey are available at <http://www.agcensus.usda.gov/>

CONVERSION FACTORS

- One quart of milk weighs 2.15 pounds
- One gallon of milk weighs 8.6 pounds
- 46.5 quarts of milk weighs 100 pounds.
- Specific gravity of milk at 60 degrees F is 1.032.

	Requires:
To make one pound of:	
Butter	21.2 pounds whole milk
Whole milk cheese	10.0 pounds whole milk
Evaporated milk	2.1 pounds whole milk
Condensed milk	2.3 pounds whole milk
Whole powdered milk	7.4 pounds whole milk
Powdered cream	13.5 pounds whole milk
Ice cream (1 gal.)	12.0 pounds whole milk <i>(15 pounds when including butter and concentrated milks)</i>
Cottage cheese	6.25 pounds skim milk
Nonfat dry milk	11.0 pounds skim milk

100 pounds of 4% milk will yield approximately:
 10 pounds cheese and 90 pounds whey or
 5 pounds butter and 90 pounds skim milk or
 13 pounds dried whole and 1-1/4 pounds 40% cream

100 pounds skim milk will yield approximately:
 16 pounds cottage cheese and 84 pounds whey or
 3 pounds casein and 94 pounds whey or
 9 pounds nonfat dry milk

100 pounds whey will yield approximately:
 5 pounds lactose and
 1 pound protein and
 1/3 pound milkfat

Department of Agriculture,
Trade and Consumer Protection
Wisconsin Agricultural Statistics Service
PO Box 8911
Madison WI 53708-8911

Wisconsin produced
53.4 million broilers
in 2014.

The average American consumed
57.7 pounds of chicken
and **180 shell eggs**
in 2013.
